

JEFREY PERALTA

SOFTWARE ENGINEER | FULL-STACK SYSTEMS | APPLIED AI

New Jersey | (908) 986-4555 | peraltajefrey@gmail.com

linkedin.com/in/jefrey-peralta-203719139 | github.com/TheRealTradeX | jefrey-peralta.vercel.app

PROFESSIONAL SUMMARY

Software Engineer and business-systems builder with experience delivering production fintech software, internal platforms, CRM automation, data workflows, third-party integrations, and AI-enabled product features. Combines full-stack engineering in TypeScript, React, Next.js, PostgreSQL, and Node.js with direct experience understanding users, translating operational requirements, supporting production systems, and driving measurable business outcomes. Currently pursuing a Bachelor of Science in Computer Science at WGU.

CORE COMPETENCIES

Languages: TypeScript, JavaScript, SQL, Python, HTML, CSS

Frontend: React, Next.js, responsive UI, dashboards, component architecture, Tailwind CSS

Backend & Data: Node.js, PostgreSQL, Supabase, REST APIs, webhooks, authentication, row-level security

Distributed Systems: Redis, BullMQ, background workers, realtime services, retries, idempotency, reconciliation

Cloud & Delivery: Vercel, Railway, Docker, Git, GitHub, CI/CD, monitoring, Sentry, incident response

AI Engineering: OpenAI APIs, LLM features, prompt design, structured validation, usage controls, AI-assisted development

Business Systems: Salesforce, CRM architecture, workflow automation, reporting, stakeholder discovery, process improvement

PROFESSIONAL EXPERIENCE

Founder & Software Engineer | Velocity Funds

2025 - Present

- Architected, built, launched, and operated a production fintech platform serving 86 registered users across customer and internal operations workflows.
- Delivered a TypeScript, React, Next.js, and PostgreSQL system spanning 237 API endpoints and 83 database tables, supported by Supabase, Redis, BullMQ, worker services, and realtime infrastructure.
- Built authentication, onboarding, account lifecycle, payments, subscription billing, payouts, webhook processing, reconciliation, risk monitoring, email automation, CRM functionality, and administrative dashboards.
- Implemented AI-assisted coaching, behavioral analysis, performance insights, and operational intelligence with structured data inputs, usage controls, and fallback behavior.
- Improved production reliability through automated tests, idempotent handlers, guarded state transitions, queue retries, row-level security, observability, recovery jobs, and incident runbooks.
- Owned product discovery, architecture, implementation, testing, deployment, debugging, customer support, vendor integrations, and continuous iteration.

Account Manager | Advanced Recovery Group

2024 - Present

- Manage commercial finance accounts, settlements, payment reconciliation, legal coordination, and stakeholder communication across complex account portfolios.
- Analyze operational breakdowns, document repeatable processes, and identify opportunities for CRM automation, reporting improvements, and workflow standardization.

PROFESSIONAL EXPERIENCE CONTINUED

Founder & Managing Partner | Utopian Estate / Nova Resolutions Group

2021 - 2024

- Built CRM-driven business systems supporting real-estate acquisitions, finance, pipeline management, reporting, and team operations.
- Designed scalable workflows and internal tooling that improved visibility, follow-up consistency, and decision-making.

PROFESSIONAL EXPERIENCE CONTINUED

Lead Acquisition Manager & Salesforce Administrator | Leverage Companies

2019 - 2021

- Designed, developed, and administered Salesforce CRM workflows, dashboards, reports, lead routing, and pipeline-management systems.
- Partnered directly with leadership and end users to translate operational requirements into practical business-system improvements.
- Supported growth from approximately \$50K to \$500K in monthly recurring revenue through scalable CRM processes, reporting, and automation.

SELECTED ENGINEERING PORTFOLIO

Velocity Funds Platform | github.com/TheRealTradeX/velocity-funds-platform

Production fintech architecture case study covering full-stack delivery, payments, distributed services, data security, applied AI, reliability, and operational ownership.

Webhook Idempotency | github.com/TheRealTradeX/webhook-idempotency

Runnable TypeScript event-processing system with 18 automated checks for duplicate delivery, concurrency, signatures, state guards, notification suppression, and recovery.

Production Engineering Modules | github.com/TheRealTradeX

Public, sanitized implementations covering worker queues, subscription reconciliation, realtime connections, Server-Sent Events, risk detection, response parsing, and React state behavior.

Engineering Portfolio | jeffrey-peralta.vercel.app

Case studies and evidence ledger for production software, applied AI systems, business automation, technical decisions, and measurable outcomes.

EDUCATION & PROFESSIONAL DEVELOPMENT

Western Governors University | Bachelor of Science, Computer Science | In Progress, 2026 - Present

The App Brewery | Complete Full-Stack Web Development Bootcamp | 2024

Salesforce Certified Administrator | 2019

Berkeley College | Business Administration Studies | 2018 - 2020

TARGET ROLES

Software Engineer, Full-Stack Engineer, Backend Engineer, Product Engineer, Applied AI Engineer, Implementation Engineer, Integration Engineer, Technical Solutions Engineer, Business Systems Engineer, and related early-career technology roles.
